

Comprehensive upper extremity rehabilitation

**COLORADO HAND THERAPY, LLC**

# Return To Work Program

## Comprehensive Upper Extremity Rehabilitation

**“Our goal is to return our patients to pre-injury work status as quickly as we can!”**

Our clinic focuses on active patient participation in the rehabilitation process including home exercise programs, injury prevention techniques and symptom management education. Communication between all involved parties helps to ensure optimal case management.

### Work Evaluation Services

**Job Site Evaluations:** Ergonomic evaluation of an injured worker's job activities and environment, with recommendations regarding correct postures, ergonomic equipment and changes required in work techniques to reduce exposure to risk of injury.

**Upper Extremity Functional Capacity Evaluations:** Three hour battery of objective and standardized evaluations for the upper extremity. Used to identify work restrictions and upper extremity performance.

**Impairment Rating Calculations:** A complimentary service performed at the request of a referring physician for any patient under our care or when data is provided.

**Ergonomic Consultation:** and customized injury prevention programs.

### Post-Injury Rehabilitation

**Comprehensive rehabilitation services** for the entire upper extremity:

- Manual therapy, therapeutic exercise.
- Static and dynamic splinting
- Work simulation with the BTE Work Simulator
- Injury prevention and education
- Home program development
